

VOICES OF THE GLOBAL SOUTH ON THE ANTHROPOCENE

Archaeological, Historical & Ancestral Perspectives WE AIM TO FACILITATE DIALOGUE BETWEEN ARCHAEOLOGY, HISTORY, PALAEOECOLOGY, AND INDIGENOUS KNOWLEDGE, WITH A PARTICULAR EMPHASIS ON THE GLOBAL SOUTH AND ITS SCHOLARS, TO ADDRESS LONG-TERM QUESTIONS SURROUNDING EARTH-SYSTEM DYNAMICS AND THE ANTHROPOCENE TRAJECTORY.

The current era, known as the Anthropocene, signifies a period where our species exerts a profound influence on Earth's systems. While geologists pinpoint the Anthropocene's formal commencement in the 1950s, the origins and drivers of this epoch have deep and often unequal historical underpinnings and consequences. Archaeology, history, and palaeoecology increasingly underscore the diversity of impacts of long-term human-environment interactions on contemporary ecosystems, which might, in turn, trigger Earth system feedbacks on a variety of different temporal scales.

To shed light on these complexities, we are assembling young scholars together with a panel of specialists from diverse backgrounds, equipped with a multifaceted methodological approach. Our mission is to underscore how dialogue between archaeology, history, palaeoecology, and Indigenous knowledge can yield insights into relationships between human land use, environmental stewardship, and the Earth system across space and time. Crucially, by ensuring the inclusion of these perspectives, with a particular emphasis on the Global South and its scholars, we endeavor addressing long-term questions regarding the impact of past Anthropocene dynamics on the Earth to inform the present and better predict the future.

Our goal is to present case studies and viewpoints from across the Global South to create the foundation for a collaborative, multi-authored Assessment Report. We plan to submit this report to the Convention of Parties (COP) 30 meeting in Brazil in 2025. We believe this can also serve as a platform for often marginalised voices. By doing so, we aim to provide a practical, tangible framework for combining historical perspectives, local science and Indigenous analysis to advocate for a more equitable and sustainable Anthropocene trajectory.

The conference will also be available online via Zoom

Further information

For more information on the Voices of the Global South on the Anthropocene workshop, contact the working group at archglobalsouth@gmail.com.

Organising committee

- Mariya Antonosyan (General coordination)
- Michael Ziegler (Communicationion)
- Rachel Rudd (Logistics)
- Victor Iminjili (Content)
- Daniella Viegas (Dissemination)
- Rebecca Lellau (On-site logistics)
- Veronica Zuccarelli (On-site logistics)
- Laura Furquim (Scientific Coordination)
- Patrick Roberts (Scientific Coordination/Supervision)

Session Ambassadors

- Gopesh Jha (Session 1)
- Victor Caetano-Andrade (Session 2)
- Freg Stokes (Session 4)
- Deepak Jha (Session 5)

Program

Thursday, June 20th

Registration	
Welcome and Opening Remarks	
Perspectives from the Global South Initiative	Laura Furquim
Presenting Case Studies Across the G-S	Conference Team
sion 1: Historical insights on the Anthropocene: wh	at does the Global South say?
Racializing the Anthropocene: Afro-Indigenous Crossings from South America	Karine Narahara
The (genetic) biodiversity of the Anthropocene:	Eduardo Relly
genetic resources and traditional	
knowledge (the case of Brazil).	
The forbidden fire and the role of rural	Vanessa Luna-Celino
communities facing increasingly flammable	
landscapes in the Peruvian Andes	
Leave it in the South: Oil conservationism in	Reynaldo de los Reyes Patiño
Latin America	
A Voice from Protected Area-affected	Marcelo Inacio DaCuhna
Quilombola Communities Traditionally	
Stewarding Amazônia: From Consultative to	
Deliberative Co-management—a Step Towards	
Collective Land Ownership?	
Additional Questions on Presentations	
Lunch	
Session 2: Palaeoecological observations of	of land use change
Worldview Clashes in Landscape Management	Juliana Lins
Dialogues	
Artivism for Cleaner Air? An Exploration of the	Felicia Liu
Artistic Depiction of 'Haze Season' in Southeast Asia	
	Welcome and Opening Remarks Perspectives from the Global South Initiative Presenting Case Studies Across the G-S sion 1: Historical insights on the Anthropocene: whe Racializing the Anthropocene: Afro-Indigenous Crossings from South America The (genetic) biodiversity of the Anthropocene: the Nagoya Protocol and indigenous perspectives on the utilization of genetic resources and traditional knowledge (the case of Brazil). The forbidden fire and the role of rural communities facing increasingly flammable landscapes in the Peruvian Andes Leave it in the South: Oil conservationism in Latin America A Voice from Protected Area-affected Quilombola Communities Traditionally Stewarding Amazônia: From Consultative to Deliberative Co-management—a Step Towards Collective Land Ownership? Additional Questions on Presentations Lunch Session 2: Palaeoecological observations of the Artistic Depiction of 'Haze Season' in Southeast

13:40 - 14:00	Environmental dynamics of a coastal ecosystem at multiple time scales: evidence from paleoecology and consequences for landscape management	Peter Gitau		
14:00 – 14:30	Additional Questions on Presentations			
14:30 – 15:00	Coffee Break			
Session 3: Colonisation in Science				
15:00 – 17:00	Workshop/brainstorming session	Workshop Participants Only		
17:00 – 18:00	Dinner			
18:00 – 19:30	Workshop/brainstorming session	Workshop Participants Only		

Friday, June 21st

8:30 - 9:00	Workshop and Session Remarks			
	Session 4: Indigenous knowledge and perspectives on the Anthropocene crisis			
9:00 - 9:20	From Goddess to Property, From Property to Legal Person: Colonialism, Capitalism, and Stories of Riverine Landscapes in Himalayan India, ca. 1200-2000	Shuvatri Dasgupta		
9:20 - 9:40	Shadows stop ecological calendar of the town of Haqui under the imaginary line of the Tropic of Capricorn in Mozambique	Uchewanda Carlitos Sitoie		
9:40 - 10:00	Knowledge and dietary practices of the Indigenous communities in Vaupés, Colombia: towards health promotion	Daniela Arango Ruda		
10:00 - 10:30	Additional Questions on Presentations			
10:30 - 11:00	Coffee Break			
11:00 – 11:20	Shamanic Epistemologies and Indigenous Perspectives on Global-South, Anthropocene, Sciences, and Development	Edson Krenak		
11:20 - 11:40	Paiter Surui Agroforestry: Challenges and Opportunities	Uraan Anderson		

11:40 - 12:00	Ancestral Climate Solutions: Reclaiming Indigenous Fire knowledge in the Anthropocene	Melinda Adams
12:00 – 12:30	Additional Questions on Presentations	
12:30 - 13:30	Lunch	
	Session 5: Heritage Sites Documentation a	and Management
13:40 - 14:00	Ala and the Igbo Heritage of 'Territorial Communion' in a More-than-Human World	J. Kelechi Ugwuanyi
14:00 – 14:20	Assessment of Threats to Heritage in Nagorno- Karabakh using Remote Sensing	Ruben Davtyan
14:20 - 14:40	An Interdisciplinary and Situated Approach to Archaeological Agricultural Landscapes: The Case of the 'Woven Terraces' of Cusi Cusi (Northwestern Argentina)	Maria Laura Pey
14:40 - 15:00	Musicalizing Heritage: A Novel Approach to Communicating Heritage Management Issues in Tanzania	Claudia Lubao
15:00 – 15:30	Coffee Break and Group Photo	
Session 6: COP Discussion: Listens and Lessons from Workshop		
15:30 - 17:00	Workshop/brainstorming session	Workshop Participants Only
17:00 -18:00	Dinner	
18:00-19:30	Workshop/brainstorming session	Workshop Participants Only

Saturday, June 22nd

12:00 - BBQ and Cultural Exchange (All welcome)
